

RETAIN WORKS

Medical Systems and Workforce have partnered to offer RETAIN WORKS to assist individuals with an injury or illness in achieving their career goals faster than they might without assistance.

Here's how it works:

If an individual has an injury or illness preventing them from working or returning to work, Stormont Vail or Ascension Via Christi reaches out to their medical provider to assist in a return to work or stay at work plan. Once the medical system is able to connect with the individual, they're referred to the workforce center where eligible individuals can participate in On-the-Job Training, classroom training, access assistive technology, connect with partner agencies, and more.

RETAINWORKS helps individuals:

- Create a personalized return to work / stay at work plan
- Speed medical recovery with a modified work schedule
- Maintain daily structure and social connections by returning or staying at work
- Maintain job skills and avoid long-term unemployment
- Reduce the likelihood of secondary complications, such as depression

RETAINWORKS helps businesses:

- Save money by not having to recruit, hire and train a replacement
- Learn more about strategies and accommodations that can help employees work more efficiently
- Reduce the frequency and duration of workers compensation claims
